Eric Farjun

Cloud & DevOps Engineer | AWS | Terraform | Kubernetes (EKS) | CI/CD

Miami, FL (Open to Remote) · **305-725-5495** · **ericfarjun@gmail.com** · linkedin.com/in/eric-farjun

PROFESSIONAL SUMMARY

Cloud and DevOps engineer with 8 years of hands-on experience designing, automating, securing, and operating production infrastructure, from on-premises networking and Linux and Windows administration to multi-account AWS platforms. Builds reusable Terraform modules and CI/CD pipelines, runs containerized workloads on Amazon EKS and ECS, and governs AWS environments with Control Tower, IAM Identity Center, and cross-account access. Experienced with security and compliance tooling, observability, disaster recovery, cost optimization, incident response, and clear documentation, with a track record of working directly with customers, developers, and security teams.

TECHNICAL SKILLS

AWS: EC2, VPC, S3, RDS, Lambda, API Gateway, ECS, EKS, ECR, IAM, IAM Identity Center, Control Tower, Transit Gateway, Route 53, ELB, CloudFront, CloudWatch, Auto Scaling

Security and Compliance: CloudTrail, AWS Config, Security Hub, GuardDuty, WAF, encryption, least privilege, cross-account IAM, SSO and SAML federation

Infrastructure as Code: Terraform (reusable modules), AWS CloudFormation, AWS CDK, Ansible

CI/CD and Version Control: GitLab CI/CD, AWS CodePipeline, CodeBuild, CodeDeploy, Jenkins, Git, GitHub, GitLab

Containers: Docker, Kubernetes, Amazon EKS, Amazon ECS, Helm, kubectl

Observability: CloudWatch, Container Insights, Nagios, PagerDuty

Scripting: Python, Bash, PowerShell

Systems and Networking: Linux (Red Hat, Ubuntu, Amazon Linux), Windows Server, Active Directory, VMware vSphere, Hyper-V, DNS, VPN and IPSec, BGP, firewalls, load balancing

Web and Databases: Nginx, Apache, Tomcat, IIS, MySQL, SQL Server

PROFESSIONAL EXPERIENCE

Cloud and DevOps Engineer — Birdsong Hearing Benefits

JUNE 2023 - PRESENT

- Design, deploy, and operate production AWS infrastructure (VPC, EC2, ECS, EKS, Lambda, API Gateway, RDS, S3) across development, staging, and production for a healthcare benefits company handling sensitive member data
- Govern a secure multi-account AWS environment with AWS Control Tower, and manage access with IAM Identity Center single sign-on, SAML federation, least-privilege IAM, and extensive cross-account roles
- Develop reusable Terraform modules that cut new-environment setup from 2 days to under 4 hours and keep environments consistent
- Build and maintain CI/CD pipelines with GitLab CI/CD and AWS CodePipeline; led the company website pipeline project, adding automated tests and security scans that replaced manual developer deployments and reduced outages
- Run 15+ containerized microservices on Amazon EKS and ECS with Docker and Helm, using autoscaling and rolling updates for zero-downtime releases
- Operate CloudTrail, AWS Config, Security Hub, GuardDuty, and AWS WAF, and enforce encryption and network segmentation, reducing publicly exposed resources by 60%
- Support multi-account network connectivity with AWS Transit Gateway and VPC routing
- Improved observability with CloudWatch dashboards, alarms, and Container Insights, reducing mean time to resolution by 30%
- Maintain disaster recovery and high availability with automated RDS backups, snapshots, and Multi-AZ failover, sustaining 99.9% database availability
- Reduced monthly AWS spend by 20% through rightsizing EC2 instances and EKS node groups and adopting Savings Plans
- Performed cloud-to-cloud workload migrations and supported the migrated applications in production

- Lead incident response and root-cause analysis, maintain runbooks and SOPs, and partner with development and security teams

AWS Cloud Operations Engineer — Mission

JUNE 2020 - JUNE 2023

- Supported production AWS environments for 40+ enterprise customers at an AWS managed services provider, sustaining 99.9% uptime and communicating directly with customers on technical issues
- Led customer onboardings by deploying Terraform modules and monitoring agents, and built infrastructure with CloudFormation and AWS CDK; reusable modules sped up onboarding by 40%
- Built and maintained CI/CD pipelines with AWS CodeDeploy, and reviewed and approved infrastructure-as-code merge requests
- Performed regular maintenance and approved change requests during maintenance windows, and monitored logs, backups, data feeds, and batch jobs daily
- Managed DNS, VPNs, SSL certificates, Elastic Load Balancers, and CloudFront for high-traffic websites, and administered Linux and Windows servers, web servers, and MySQL and SQL Server databases
- Automated recurring tasks with Python and Bash, saving first-level engineers about 8 hours per week
- Conducted root-cause analysis on recurring incidents, reducing repeat tickets by 25%

Linux System Operations Specialist — CBS Interactive

MAY 2019 - JUNE 2020

- Monitored and troubleshot 500+ Red Hat and Ubuntu servers daily with Nagios and PagerDuty
- Administered Red Hat systems including NFS, LVM, Postfix, BIND DNS, and users and groups, and tuned Nginx and MySQL configurations
- Managed SSL certificates on Citrix NetScaler with DigiCert, and built and managed VMs in VMware vSphere
- Automated routine tasks with Python and Bash, reducing manual work by about 20%, and version-controlled server changes with Git

Network Administrator — KRS Global Biotechnology

OCTOBER 2018 - MAY 2019

- Configured BGP, EIGRP, GRE tunnels, DMVPN, IPSec VPNs, NetFlow, and SNMP on Cisco devices between sites
- Managed firewalls, access lists, DMZs, and endpoint, email, and web security
- Administered Windows Server 2012, Active Directory, Group Policy, DNS, DHCP, Hyper-V, and file servers for 100+ users, and supported Office 365
- Maintained network documentation and diagrams, and trained staff on system security and virus prevention

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

AWS Certified SysOps Administrator – Associate

AWS Certified Developer – Associate

EDUCATION

Florida International University — B.A., Sociology and Anthropology

Broward College — Network Server Administration

Cisco Networking Academy — CCNA Routing and Switching
